

**“I COULDN’T TALK.
MY THOUGHTS
WERE JUMBLED.”**

For my health, I choose Redmond.

Bobby
Stroke Survivor

Bobby was at his restaurant when he realized that he couldn’t speak and his thoughts were jumbled. He was taken by ambulance to Redmond’s ER where the stroke team was waiting for him. The rapid diagnosis allowed Bobby to be treated with the clot dissolving medicine tPA within 17 minutes of arrival to improve blood flow to his brain. Forty-five hours after arrival, Bobby left the hospital with no effects from the stroke. Now he is back to running his restaurant and working on his farm.
